VB7671 Bullet Camera

4MP Full HD 1080p

Overview

VIDEOTEKNIKA VB7671 is a compact, stylish fixed bullet camera with WDR designed for outdoor applications with a 4 Megapixel sensor enabling a viewing resolution of 2688 x 1520 (Full HD 1080p Real Time). The multitasking day & night camera provides unlevelled cost effective performance making the product a market leader in its segment. The camera allows versatile indoor use through its True Day & Night feature and its vandal resistance. The VB7671 features a 3-Axis adjustment bracket. The camera incorporates a 1/3" CMOS chip with progressive scan technology enabling sharp images in highly populated locations. The VB7671 also supports POE.

Supported Compression

The VB7671 supports MJPEG compression technology, a digital video encoding standard where each video frame is separately compressed into a JPEG image. The VB7671 also supports the industry standard H.264 compression, the most recent compression technology that reduces drastically video file sizes therefore allowing for better storage and lowers bandwidth demands.

Dual Streaming

The VB7671 allows for dual independent streaming images to pass through the video coder. The resolution, frame rate and bit rate can be set independently on both streams. The main application for dual streams allows for high resolution and high frame rate streaming for recording while allowing lower resolution and frame rate for computer browsing and mobile device applications.

Supported Software

The Camera is supported by the Videoteknika VVMS-*Xpert*™ VMS. The VVMS-*Xpert*™ VMS is a modular Video Management Software dedicated for Videoteknika IP cameras expandable up to 1024 Channels per server. A 64 Ch version VVMS-*Advanced*™ is supplied as a free bundled software with all Videoteknika IP Cameras. VVMS-*Mobile*™ is also available on Iphone and Android applications. Videoteknika IP cameras are supported by various leading software development VMS partners.
